OUR STORY

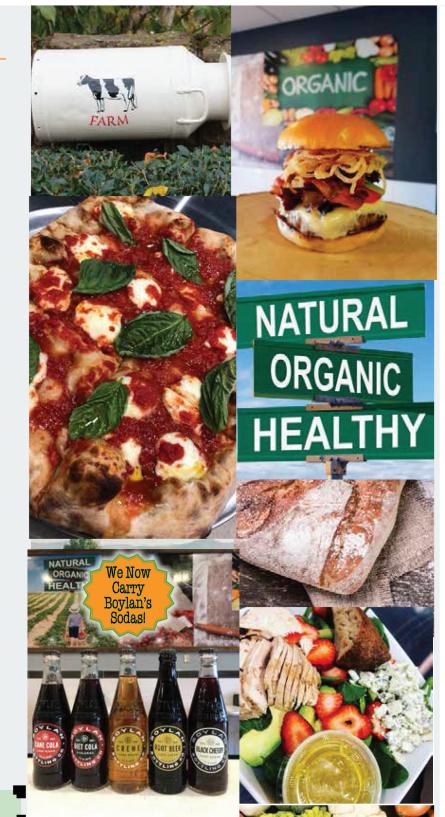

Restaurants face many challenges today, prices are always on the rise, and flavors are constantly changing. We promise to not only use the tastiest ingredients, but to also consciously choose our source of those ingredients. Many people think "Organic, okay, it's better for you, but it doesn't taste good". We want to change their minds.

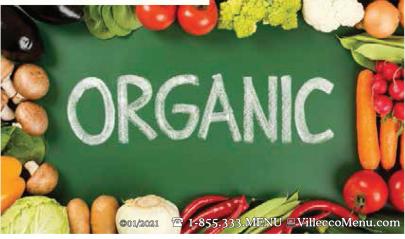

We use all of the best organic ingredients available to us, Organic Central Milling Flour, organic tomatoes imported from Italy, mozzarella from a family owned company who made their own conscious decision to offer dairy without rBST, a bovine hormone that makes cows produce more milk. The result of their choice has won them many awards for being the best tasting. What do all of these amazing ingredients equate to? Our mission...to not only offer a healthier option, but a tastier one. All of our sources are carefully chosen, and hold the standard that we believe in.
